

Forget carrying and lifting heavy weights, use a Helaform light conveyor system to help you

With a simple conveyor system you can easily move your milking machine from stall to stall in your cowshed.

Conveyor system is also suitable for use in paint shops, in theatres for scenery moving, to move heavy tools and many other applications where heavy items need to be moved from one place to another with the minimum effort.

The systems are easy and simple to install, providing a safe and comfortable working environment. No more heavy lifting and possible back strains, making your work load easier and less strenuous.

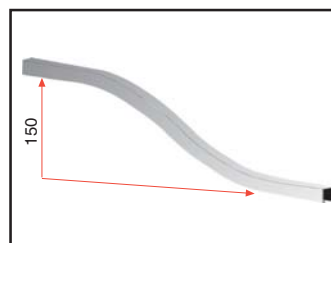

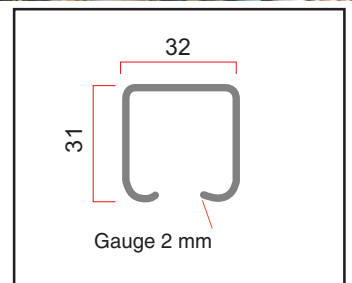

Three-way rail switch, complete
(1x Y-rail switch, 1 x right rail switch,
1 x left rail switch + 2 x curve)
